

International Experts Workshop

“Much more than Carbon Footprint”

Is Carbon Footprint enough to evaluate the environmental sustainability of products?

Approaches for assessment and communication.

With this Experts Workshop, on behalf of the Austrian Federal Ministry of Agriculture, Forestry, Environment and Water Management and ECR (Austria) we aim to contribute to the European process of developing a standard for measuring and communicating the ecological sustainability of products. We provide a platform to meet experts for Carbon Footprint, Water Footprint, Resource Use and Land use as well as national and European policy makers.
